a. Poverty line is equivalent to \$1.08 (1993 PPP US\$). b. Data refer to the most recent year available during the period specified. c. For information on survey years and whether data refer to income or consumption, see column 1 of table 13. d. Data refer to the average for the years specified. e. Data refer to the 1990/91, 1999/2000 or 2000/01 school year. Data for some countries may refer to national or UNESCO Institute for Statistics estimates. For details, see <http://www.uis.unesco.org/>. Because data are from different sources, comparisons across countries should be made with caution. f. The net enrolment ratio is the ratio of enrolled children of the official age for the education level indicated to the total population of that age. Net enrolment ratios exceeding 100% reflect discrepancies between these two data sets. g. Data refer to the 1998/99 school year. h. Data are preliminary and subject to further revision. i. Data refer to the 1992/93 school year. j. Data refer to the 1999/2000 school year. k. Data refer to the 1991/92 school year. l. Data refer to a year or period other than that specified, differ from the standard definition or refer to only part of the country. m. Data refer to a year or period other than that specified. n. Excluding the Republic of Korea; see East Asia and the Pacific.

a. Calculated as the ratio of girls' enrolments to boys'. Data refer to the 1990/91 or 2000/01 school year. For the 2000/01 school year, data for some countries may refer to national or UNESCO Institute for Statistics estimates. For details, see <http://www.uis.unesco.org/>. Because data are from different sources, comparisons across countries should be made with caution. Enrolments for years after 1997 are based on the new International Standard Classification of Education, adopted in 1997 (UNESCO 1997), and so may not be strictly comparable with those for earlier years. b. Calculated on the basis of female and male youth literacy rates. c. Data refer to the lower house only and are as of 1 March 2003. For more detailed information on the status of the parliament in particular countries, see table 27. d. Data refer to 2000. e. Data refer to the 1998/99 school year. f. Data refer to the 1999/2000 school year. g. Preliminary UNESCO Institute for Statistics estimate, subject to further revision. h. Data refer to 1998. i. Data refer to 1991. j. Data refer to 1999. k. Data refer to 2002. l. Excludes Turkish students. m. Data refer to 1992. n. Excluding the Republic of Korea; see East Asia and the Pacific.

Source: Columns 1-4: UN 2003a, based on data from the UNESCO Institute for Statistics; columns 5 and 6: World Bank 2003c, based on data from the UNESCO Institute for Statistics; columns 7 and 8: UN 2003a, based on data from the International Labour Organization; column 9: UN 2003a, based on data from the Inter-Parliamentary Union; column 10: IPU 2003b.

Reduce by two-thirds, between 1990 and 2015,  
the under-five mortality rate

Reduce by three-quarters,  
between 1990 and 2015,  
the maternal mortality ratio

a. The primary agencies responsible for these two Millennium Development Goal indicators are the United Nations Children's Fund (UNICEF) and the World Health Organization (WHO). The table shows World Bank estimates, however, because the more recent estimates from UNICEF and the WHO were not ready for release. The estimates shown are largely consistent with the UNICEF and WHO estimates. b. Data are estimates based on available national data and adjusted for the well-documented problems of underreporting and misclassification of maternal deaths or, where national data are unavailable, model-based estimates. The estimates shown are not comparable with the reported maternal mortality ratios in table 8. c. Data refer to the most recent year available during the period specified. d. Data refer to 1992. e. Data refer to the Gaza Strip only. f. Data refer to a year or period other than that specified, differ from the standard definition or refer to only part of the country. g. WHO 2003d. h. Data refer to 1991. i. Excluding the Republic of Korea; see East Asia and the Pacific. Source: Columns 1-4: World Bank 2003c; aggregates calculated for the Human Development Report Office by the World Bank; column 5: WHO 2003d, based on data from a joint effort by UNICEF and the WHO; aggregates calculated for the Human Development Report Office by the WHO; column 6: UNICEF 2003b, based on data from a joint effort by UNICEF and the WHO; aggregates calculated for the Human Development Report Office by the WHO; column 7: UN 2003a, based on data from a joint effort by the WHO, UNICEF and the United Nations Population Fund; aggregates calculated for the Human Development Report Office by the WHO; column 8: UN 2003a, based on data from a joint effort by UNICEF and the WHO; aggregates calculated for the Human Development Report Office by the WHO.

GOAL 6 Combat HIV/AIDS, malaria and other diseases

Have halted by 2015 and begun to reverse the spread of HIV/AIDS

Have halted by 2015 and begun to reverse the incidence of malaria and other major diseases

	HIV prevalence among pregnant women aged 15-24 (%) <sup>a</sup>		Condom use at last high-risk sex (% age 15-24) <sup>b</sup>		Orphans' school attendance rate as % of non-orphans <sup>c</sup>	Malaria-related mortality rate (per 100,000)		Malaria cases (per 100,000 people) <sup>d</sup>	Children under 5 With insecticide-treated bed nets (%)		Tuber-culosis-related mortality rate (per 100,000 people) <sup>e</sup>	Tuberculosis cases

a. Data are median estimates based on data collected from surveillance sites, mainly antenatal clinics. b. Because of data limitations, comparisons across countries should be made with caution. Data for another agreed indicator under the HIV/AIDS target, the percentage of young people aged 15-24 who correctly identify two ways of preventing the sexual transmission of HIV and who reject major misconceptions about HIV transmission, are not yet available. Data for two proxy indicators of HIV/AIDS knowledge and misconceptions among 15- to 24-year-olds are available. For details, see <http://millenniumindicators.un.org>. c. Data refer to children aged 10-14. d. Data refer to malaria cases reported to the World Health Organization (WHO) and may represent only a fraction of the true number in a country because of incomplete reporting systems, incomplete coverage by health services or both. Because of the diversity of case detection and reporting systems, comparisons across countries should be made with caution. e. Excluding HIV-related deaths. f. Data refer to the prevalence of smear-positive cases of tuberculosis. g. Calculated by dividing the new smear-positive cases of tuberculosis detected under the directly observed treatment, short course (DOTS) case detection and treatment strategy by the estimated annual incidence of new smear-positive cases. Values can exceed 100% because of intense case detection in an area with a backlog or chronic cases, overreporting (for example, double counting), over-diagnosis or underestimation of incidence (WHO 2003e). h. Data refer to the percentage of new smear-positive cases registered for treatment under the DOTS case detection and treatment strategy in 2000 that were successfully treated. i. Data refer to the most recent year available during the period specified. j. Data refer to 1999. k. Data refer to both sexes combined. l. Data refer to Northern Sudan only. m. Estimate based on data from all antenatal clinics. n. Data refer to 1997. o. Data refer to 1998. p. Data refer to 1994. q. Data refer to 1995. r. Excluding the Republic of Korea; see East Asia and the Pacific.

Source: Columns 1 and 2: UN 2003a, based on data from a joint effort by the WHO and the Joint United Nations Programme on HIV/AIDS (UNAIDS); columns 3 and 4: UN 2003a, based on data from a joint effort by the United Nations Children's Fund (UNICEF), UNAIDS and the WHO; columns 5, 9 and 10: UN 2003a, based on data from UNICEF; columns 6-8 and 11-14: UN 2003a, based on data from the WHO.

Integrate the principles of sustainable development into country policies and programmes  
and reverse the loss of environmental resources<sup>a</sup>

a. The World Health Organization is collecting country data for another indicator under this target, the proportion of the population using solid fuels, to be published in *World Health Report 2003* (WHO forthcoming).

b. Refers to the ratio of area protected to maintain biological diversity to surface area. Surface area is a country's total area, including areas under inland bodies of water and some coastal waterways but excluding sea areas. Data for some countries include overseas territories. c. Data refer to chlorofluorocarbons controlled under the Montreal Protocol on Substances That Deplete the Ozone Layer, measured in metric tons multiplied by a factor of ozone-depleting potential (ODP). d. Data refer to 1989. e. Data refer to 2000. f. Data refer to 1998. g. Data refer to 1991. h. Data refer to 1992. i. Data refer to 1999. j. Excluding the Republic of Korea; see East Asia and the Pacific. k. No data are available for individual member countries of the European Union (EU). The member countries are Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden and the United Kingdom. Estimates for EU member countries as a group are 170,331.4 ODP metric tons in 1990 and 2,317.1 ODP metric tons in 2001. l. Including Luxembourg. m. Included in data for Belgium.

a. The United Nations Human Settlements Programme (HABITAT) has prepared country estimates of slum dwellers for this target using several indicators: the proportion of the urban population with sustainable access to an improved water source, the proportion of the urban population with access to improved sanitation, an indicator of overcrowding and an indicator of the durability of housing. Estimates for another indicator to be used in this exercise, the proportion of households with access to secure tenure, will become available soon. b. Excluding the Republic of Korea; see East Asia and the Pacific. c. Data refer to the world aggregate according to UNICEF 2003b.

Source: Columns 1-6: UN 2003a, based on data from a joint effort by the United Nations Children's Fund and the World Health Organization.

Note: This table presents data for members of the Development Assistance Committee (DAC) of the Organisation for Economic Co-operation and Development (OECD).

a. Includes imputed multilateral flows that make allowance for contributions through multilateral organizations. These are calculated using the geographic distribution of disbursements for the year specified. b. Data refer to the average for the years specified. c. Data for individual countries (but not the DAC average) include forgiveness of non-ODA claims.

Note: The table excludes high-income countries (as defined by the World Bank; see classification of countries) because the debt indicators it presents are not produced for these countries.

a. Data are as of March 2003. The Debt Initiative for Heavily Indebted Poor Countries (HIPCs) is a mechanism for debt relief, jointly overseen by the International Monetary Fund (IMF) and the World Bank. Bilateral and multilateral creditors have provided debt relief through this framework to heavily indebted poor countries since 1996. By March 2003, 26 countries had reached their decision points, and of these, 8 had also reached their completion points (see the definitions of statistical terms). b. Data refer to 1992. c. Data refer to 2000. d. Country included in the HIPC initiative. e. Decision and completion points not yet reached under the HIPC initiative. f. Data are from debt sustainability analyses undertaken as part of the HIPC initiative. Present value estimates for these countries are for public and publicly guaranteed debt only, and export figures exclude workers' remittances. g. Completion point reached under the HIPC initiative. h. Decision point reached under the HIPC initiative. i. Data refer to 1991. j. Estimates reflecting assistance under the enhanced HIPC initiative will be presented in World Bank forthcoming. k. Data refer to mainland Tanzania only.

**GOAL 8 Develop a global partnership for development: work opportunities, access to drugs and access to new technologies**

*Develop and implement strategies for decent and productive work for youth*

*Provide access to affordable essential drugs in developing countries*

*Make available the benefits of new technologies, especially information and communications*

	Youth unemployment (% of labour force aged 15-24) <sup>a</sup>						Population with sustainable access to affordable essential drugs (%) <sup>b</sup> 1999	Telephone mainlines and cellular subscribers (per 100 people)		Internet users (per 100 people)		Personal computers in use (per 100 people)

*Note:* The targets covered in this table read in full as follows: In cooperation with developing countries, develop and implement strategies for decent and productive work for youth. In cooperation with pharmaceutical companies, provide access to affordable essential drugs in developing countries. In cooperation with the private sector, make available the benefits of new technologies, especially information and communications.

*a.* As a result of limitations in the data, comparisons of labour statistics over time and across countries should be made with caution. For detailed notes on the data, see ILO 2002a, 2002b and 2003b. *b.* The data on access to essential drugs are based on statistical estimates received from World Health Organization (WHO) country and regional offices and regional advisers and through the World Drug Situation Survey carried out in 1998-99. These estimates represent the best information available to the WHO Department of Essential Drugs and Medicines Policy to date and are currently being validated by WHO member states. The department assigns the estimates to four groupings: very low access (0-49%), low access (50-79%), medium access (80-94%) and good access (95-100%). These groupings, used here in presenting the data, are often employed by the WHO in interpreting the data, as the actual estimates may suggest a higher level of accuracy than the data afford. *c.* Data refer to 1999. *d.* Data refer to 1992. *e.* Data refer to 2000. *f.* Data refer to 1991. *g.* Data refer to 1989. *h.* Data refer to 1988. *i.* Data refer to 2002. *j.* Data refer to 1998. *k.* Excluding the Republic of Korea; see East Asia and the Pacific.
