Prof Piketty is the initiator of the recent literature on the long-run evolution of top income shares in national income. These works have led to radically question the optimistic relationship between development and inequality posited by Kuznets, and to emphasize the role of political, social and fiscal institutions in the historical evolution of income and wealth distribution. He is also the author of the international best-seller Capital in the 21st Century. He is a columnist for the French newspaper Le Monde.

Belinda Reyers, Senior Advisor on Resilience and Development at Stockholm Resilience Centre, Stockholm University, Sweden and Extra-ordinary Professor at the Centre for Sustainability Transitions, University of Stellenbosch, South Africa

Prof Belinda Reyers' work bridges sustainability science and development practice. Together with regional and international collaborators from research, policy and practice, she focuses on co-producing and mobilizing research and knowledge to help build the understanding and capacity of early career researchers and practitioners to navigate the complex social-ecological development challenges facing Africa. These experiences also directly shape and inform the research programs she leads. A current focus of her collaborative transdisciplinary research is to understand the dynamic linkages between sustainability and equity, especially in the context of more complex, connected and uncertain futures. Prof Reyers received her PhD from the University of Pretoria, South Africa in 2001. She subsequently established and led the Biodiversity and Ecosystem Services Research Group at the Council for Scientific and Industrial Research in Stellenbosch, South Africa, where she worked as a Chief Scientist until 2015. From 2015 – 2018, Prof Reyers was the Director of the GRAID Resilience and Development program at the Stockholm Resilience Centre in Sweden. Krushil Watene (Ngāti Manu, Te Hikutu, Ngāti Whātua o Orākei, Tonga), Associate Professor in Philosophy, Massey University, New Zealand.

Prof. Watene's research addresses fundamental questions in moral and political philosophy, particularly those related to well-being, development, and justice. Her primary areas of expertise include mainstream theories of well-being and justice, obligations to future generations, and Indigenous Philosophies. Much of her work is written from the perspective of the 'capability approach' - improving people's lives by expanding their real opportunities to live the kinds of lives they value and have reason to value - and centers Māori Philosophy. Prof. Watene's work is applied and engaged - encompassing a range of justice and ethical issues, in such areas as health policy, environmental sustainability, and a variety of development considerations, as they feature within communities. Her research contributes to high-level discussions of indigenous concepts in global justice theorizing, grounded in research that demonstrates the central role of local indigenous communities. Prof. Watene holds a PhD in Philosophy from the University of St. Andrews. She was awarded a Rutherford Discovery Fellowship in 2018 for research on intergenerational justice. She serves on the Strategic Leadership Group of the Te Punaha Matatini, and is a member of the Independent Resource Group for Global Health Justice.

Prof. Dr. Helga Weisz, Head of Research, Transdisciplinary Concepts and Methods, Potsdam Institute for Climate Impact Research, Germany

Helga Weisz is full professor of Industrial Ecology and Climate Change at Humboldt-University Berlin and head of the FutureLab Social Metabolism and Impacts at the Potsdam Institute for Climate Impact Research (PIK), Germany. Previous positions include assistant and associate professor at the Institute of Social Ecology, Vienna, guest professor at Universitat Autònoma de Barcelona, University St. Gallen, and Yale University. Her academic background is in Molecular Biology, Cultural Studies and Social Ecology. Her research focuses on the socially organized extraction of raw materials and energy, its transformation into goods and services, its use and final disposal to the environment as waste, emissions and heat, which, collectively, define the social metabolism. Transforming the industrial metabolism to reduce its environmental and resource impacts, while maintaining its function for human well-being, is a crucial challenge for sustainability. Prof. Weisz investigates socio-metabolic transitions and patterns at global, national, local, and sectoral scales and their implications for wellbeing, inequality, and power relations. She has published in high ranking general and specialized journals such as PNAS, Science Advances, Nature Communications, Scientific Reports, Environmental Research Letters, Earth System Dynamics, Journal of Industrial Ecology, or Ecological Economics among others. Among many other science community services, Prof. Weisz is a member of the governing board of the International Institute for Applied Systems Analysis (IIASA), located in Laxenburg, Austria, of the steering committee of the Swiss National Science Foundation's National Research Program "Sustainable Economy" (NRP 73), of UNEP's International Resource Panel and editor-in-chief of the transdisciplinary sustainability journal GAIA.
