Forord

UNDP presenterer Human Development Report 2009 idet verden står overfor den verste økonomiske nedgangsperioden siden 1930-tallet. Det som startet som en finanskrisje på Wall Street fører nå til at millioner av mennesker verden over mister jobbene sine. Alt fra amerikansk bilindustri til norsk aluminiumsindustri og kambodsjansk klesindustri, har fått merke konsekvensene. Mennesker står overfor det vanskelige valget mellom arbeidsledighet og å måtte flytte.

Mange velger å flytte. De aller fleste flytter innenfor landets grenser eller til nabolandet, men noen reiser lengre. Menneskelig mobilitet er et fenomen som har kommet for å bli. Spørsmålet er hvordan vi hankses med det. Ser vi på det som et problem, og svarer med å bygge hoyere murer? Eller ser vi potensialet og sørger for å høste fordelene av migrasjonen? Denne rapporten argumenterer for det siste alternativet.

Sentralt for menneskelig frihet er retten til å kunne bestemme hvor vi vil bo. Men rapporten viser også hvordan migrasjon bidrar til utvikling, både i bestemmelses- og – opprinnelseslandet. Land, som de nordiske, får sårt tiltrent arbeidskraft, mens utviklingslandene får økt kapital gjennom pengene migrantene sender hjem til sine familier. Men de som arbeider i utlandet sender hjem mer enn penger. De bringer også tilbake nye ideer og erfaringer. Tanker om demokrati eller kvinners rettigheter sammen med den profesjonelle ekspertisen de har fått, bidrar til utviklingen i hjemlandet.

Fordelene med migrasjon er betydelige, men de er langt fra selvsagte. Istedentfor bare å fokusere på utfordringene knyttet til migrasjon bør regjeringer fokusere mer på politiske strategier som kan maksimere den positive effekten av økt mobilitet, både for vertslandet og hjemlandet.

Uten institusjonell endring vil gevinsten fra migrasjon være usikker, og ikke alltid komme de fattigste til gode. Arbeidsinnvandrere er ofte de første som mister jobben i nedgangstider. Byråkratiske hindringer, som at pass og andre dokumenter er dyre, begrenser mulighetene de fattigste arbeiderne har for å krysse grenser. Remisser når i mindre grad også de aller fattigste landene. Derfor er det helt nødvendig at migrasjon ses på som en komplementær, ikke alternativ, strategi til bistand, handel og annen utviklingsfremmende politikk. Migrasjon er bare én del av en bredere internasjonal innsats for å bekjempe fattigdom og fremme menneskelig utvikling.

For å utnytte potensialet som ligger i menneskelig mobilitet bør myndigheter bygge sterke institusjoner og integrere mobilitet i utviklingsstrategiene slik at penge og ideer kan komme hele landet til gode, ikke bare enkelthusholdninger. Mennesker som beveger seg innad og mellom land må også sikres de samme rettighetene og tilgang til tjenester som befolkningen ellers. Mennesker som er på flukt fra krig og konflikt må beskyttes, og det internasjonale samfunnet må fortsette arbeidet for å forebygge det som forårsaker flyktningstrømmene, nemlig konflikt og dårlig styresett.

UNDP samarbeider med nasjonale partnere for å styrke demokratier og utvikle bærekraftige og legitime institusjoner som kan forbedre folks liv. Vi mener at demokratisk styresett er nøkkelen til menneskelig utvikling og bekjempelse av fattigdom, konflikter, miljøødeleggelsjer og hiv/aids. Til grunn for alt vi gjør, ligger menneskerettighetene og arbeidet for å styrke kvinners stilling i samfunnet.

UNDP utgir hvert år Human Development Report, en uavhengig rapport om sentrale utviklings-spørsmål med nyskapende analyser og policyanbefalinger. Rapporten inneholder også Human Development Index som tilbyr oppdatert statistikk om menneskelig utvikling.

Å bryte barrierer: Menneskelig mobilitet og utvikling

Juan ble født inn i en fattig familie på den mexicanske landsbygda. Familien strevde hardt for å greie å betale for helsetjenester og utdanning for gutten, og da han var tolv, sluttet han på skolen for å kunne tjene penger til familien. Seks år senere dro Juan til onkelen sin i Canada på jakt etter høyere lønn og bedre fremtidsutsikter. Den forventede levealderen i Canada er fem år høyere enn i Mexico, og lønningene er tre ganger så høye. Juan fikk midlertidig oppholds-tillatelse i Canada, ble der lenge nok til at han fikk fast opphold, og startet etter hvert sin egen bedrift, som i dag sysselsetter innfødte canadiere. Dette er bare ett eksempel på de mange millioner mennesker som hvert år søker nye muligheter og større frihet gjennom migrasjon, til beste for dem selv og for hjem- og vertslandet.

Bhagyawati tilhører en lavkaste og bor på den indiske landsbygda, i Andhra Pradesh. Sammen med barna sine drar hun hvert år til storbyen Bangalore for å jobbe i seks måneder på byggeplasser, der hun tjener 60 rupies (1,20 USD) om dagen. Barna går ikke på skole når de er i byen, ettersom skolen ligger for langt unna og de ikke snakker det lokale språket. Bhagyawati har ikke rett til subsidiert mat eller helsetjenester og kan heller ikke stemme, av den enkle grunn at hun bor utenfor distriktet der hun er registrert. Som så mange andre interne migranter har hun få andre muligheter til å bedre sin livssituasjon enn å flytte til en annen by.

Vi lever i en verden preget av ulikhet. De enorme forskjellene i utviklingen på tvers av, og innad i land, er et tema som har gått igjen i "Human Development Report" (HDR) helt siden den første rapporten kom ut i 1990. I år er det første gang migrasjon er tema for rapporten. For mange mennesker i utviklingsland kan den beste – av og til også den eneste – muligheten de har til å bedre sine livsutsikter, være å flytte fra hjembyen eller landsbyen. Mobilitet kan være et svært hensiktsmessig virkemiddel for å bedre inntekt, helse og utdanningsmuligheter. Men ikke bare det: Sentralt i den menneskelige frihet står retten til å kunne bestemme hvor vi vil bo.

Når folk flytter, legger de ut på en reise som innebærer håp og usikkerhet, enten det skjer innenfor eller på tvers av hjemlandets grenser. De fleste flytter på jakt etter bedre muligheter, i håp om å kunne forene egne krefter med ressurser i vertslandet – til beste for seg selv og den nærmeste familie, som gjerne reiser i folge med dem eller kommer etter. Dersom de lykkes, kan initiativet og innsatsen deres gagne også dem som har blitt igjen hjemme, og samfunnet der de bygger opp sin nye tilværelse. Men det er ikke alle som lykkes. Migranter som reiser fra slekt og venner, kan oppleve ensomhet, føle seg utstøtt av mennesker som er redde for eller misliker innflyttere, miste jobben eller bli syke og dermed miste tilgang til støtteapparatet som er nødvendig for å trives.

I 2009-utgaven av HDR ser vi nærmere på hvordan en godt tilrettelagt politikk, kan styrke den menneskelige utviklingen. I rapporten argumenteres det for at myndigheter må legge færre restriksjoner på forflytning innenfor og på tvers av sitt eget lands grenser, og dermed gi folk flere valgmuligheter og større frihet. Det drøftes også praktiske tiltak som kan forbedre migranternes utsikter ved ankomst, noe som vil få positive ringvirkninger både for deres nye og gamle lokalsamfunn.

Hvordan og hvorfor folk flytter

Diskusjoner om migrasjon har gjerne som utgangspunkt en forestilling om at det strømmer inn mennesker fra utviklingsland til de rike landene i Europa, Nord-Amerika og Oseania. Likevel foregår ikke de fleste forflytningene i verden mellom utviklingsland og industriland – de foregår ikke en gang mellom land. Det overveldende flertallet flytter innenfor eget land. Ifølge forsiktige anslag er omrent 740 millioner mennesker interne migranter – nesten fire ganger så mange som dem som flytter til andre land. I sistnevnte gruppe flytter i overkant av en tredjedel fra et utviklingsland til et industriland, det vil si færre enn 70 millioner mennesker. De fleste av verdens 200 millioner internasjonale migranter flytter fra ett utviklingsland til et annet, eller mellom industriland.

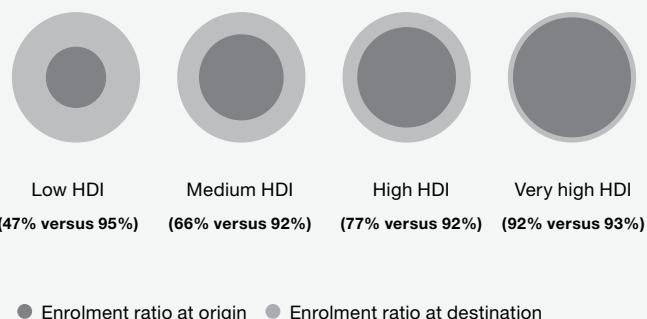

De fleste migranter, det være seg interne eller internasjonale, høster fordeler i form av høyere inntekt, bedre tilgang til utdanning og helsetilbud samt lysere fremtidsutsikter for barna. I undersøkelser svarer de fleste migrantene at de er fornøyde

med livet på sitt nye hjemsted, selv om flytting gjerne medfører stor grad av tilpasning og mange

hindringer som må overkommes. Når migranter er vel etablerte, er det større sannsynlighet for at de blir med i fagforeninger eller lag av ulike slag, for eksempel religiøse samfunn, enn de fastboende. Like fullt må det inngås kompromisser, og for-delene ved mobilitet er ulikt fordelt.

Mennesker som er fordrevne på grunn av usikkerhet og konflikt, står overfor særlige utfordringer. Det anslås at om lag 14 millioner flyktninger bor utenfor landet der de har statsborgerskap. Det tilsvarer ca. 7 % av verdens migranter. De fleste oppholder seg i nærheten av landet de flyktet fra,

og bor som regel i leirer til forholdene i hjemlandet er tilstrekkelig stabilisert til at de kan flytte hjem, mens rundt regnet en halv million mennesker hvert år reiser til industrialiserte land og søker asyl der. Langt flere – om lag 26 millioner – er internt fordrevne. De har ikke krysset noen grense, men kan like fullt oppleve store vanskeligheter når de må forlate hjemmet i et land som er sørderrevet av konflikt eller rammet av naturkatastrofer. En annen sårbar gruppe utgjøres av dem som har vært utsatt for menneskehandel, i hovedsak unge kvinner. De blir ofte lokket med løfter om et bedre liv, men flytter ikke frivillig. Her brukes det tvang, enkelte ganger også vold og seksuelle overgrep.

Men som regel flytter folk av egen, fri vilje - til steder der de kan få et bedre liv. Mer enn tre fjerdedeler av de internasjonale migrantene drar til et land med høyere utviklingsnivå enn hjemlandet. Likevel begrenses de i betydelig grad, både av politikk som legger begrensninger på innreise, og av manglende ressurser for å kunne gjennomføre flytteprosessen. Mennesker i fattige land er minst mobile: Mindre enn 1 % av innbyggerne i Afrika har for eksempel flyttet til Europa. Både historien og samtiden viser oss at utvikling og migrasjon går hånd i hånd: Median utvandring i land med lav menneskelig utvikling ligger under 4 prosent, sammenlignet med mer enn 8 prosent i land med høy menneskelig utvikling.

Mobilitetshindringer

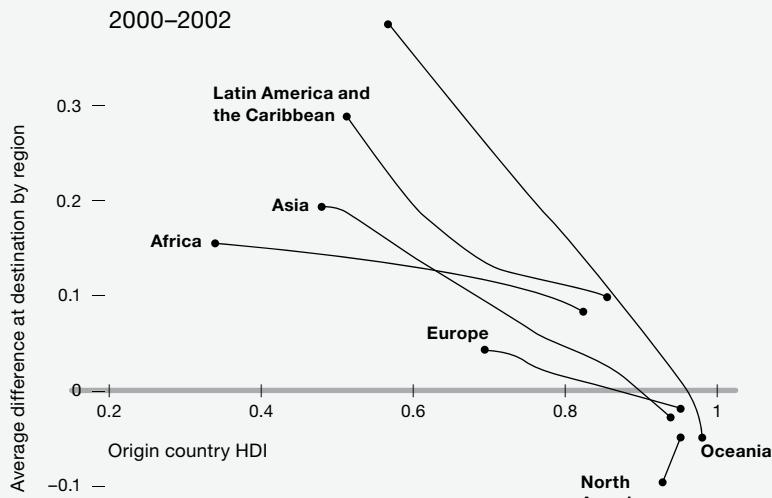

Internasjonale migranters andel av verdens befolkning har ligget bemerkelsesverdig stabilt på rundt 3 prosent de siste 50 årene, til tross for at mange forhold skulle tilsi økt migrasjon. Den demografiske utviklingen – en aldrende befolkning i de industrialiserte landene og en ung og voksende befolkning i utviklingslandene – og bedre muligheter på arbeidsmarkedet har, sammen med billigere kommunikasjon og transport, økt «ettterspørselen» etter migrasjon. De som ønsker å migrere, støter likevel i stadig sterkere grad på myndighetspålagte mobilitetshindringer. I løpet av det forrige århundret ble antallet nasjonalstater firedoblet og teller nå nærmere 200. Dermed er det blitt flere landegrenser å krysse. Samtidig har endringer i politikken bidratt til å begrense omfanget av migrasjon, til tross for nedbygging av handelshindre.

Mobilitetshindrene er ekstra høye for lavt kvalifiserte arbeidstakere, til tross for at

arbeidskraften deres er etterspurt i mange rike land. Generelt sett føres det en politikk som gjør det enklere for folk med utdanning å slippe inn, for eksempel ved at studenter får oppholdstilatelse når de er ferdige med studiene, og ved at fagfolk og deres familier får tilbud om bosetting. Men myndighetene er ofte langt mer ambivalente når det gjelder lavt kvalifisert arbeidskraft, som ofte blir dårlig behandlet og har svært lav status. I mange land finnes det jobber innen jordbruks-, bygg- og anleggsbransjen, produksjon og tjenestesektoren som utføres av disse migrantene. Likevel forsøker myndighetene ofte å sende de lavest utdannede migrantene inn og ut av landet, slik at midlertidige og ulovlige arbeidsinnvandrere til tider behandles som vann fra en kran som kan skrus av og på etter behov. Det antas at om lag 50 millioner mennesker i dag bor og jobber utenlands med irregulær status. I enkelte land, som Thailand og USA, tillates det et stort antall ulovlige arbeidsinnvandrere. Disse kan da få tilgang til bedre betalte jobber enn i hjemlandet, men selv om de ofte gjør den samme jobben og betaler skatt på lik linje med de fastboende, har de ikke alltid tilgang til grunnleggende tjenester og risikerer å bli utvist. I noen land, som Italia og Spania, har myndighetene erkjent at ufaglærte migranter bidrar til samfunnet og har derfor legalisert dem som er i arbeid, mens andre land, for eksempel Canada og New Zealand, har skreddersydd programmer for sesongarbeidere i blant annet jordbrukssektoren.

Mens det er bred enighet om at høyt kvalifiserte migranter er en verdifull ressurs for vermlandet, er lavt kvalifiserte arbeidsinnvandrere svært omstridt. Det er en utbredt oppfatning at selv om disse innvanderne fyller ledige stillinger, tar de også jobben fra lokale arbeidstakere og bidrar til lavere lønn. Andre sider ved migrasjonsstrømmen som gjerne gir grunn til bekymring, er økt fare for kriminalitet, større belastning på lokale tjenester og frykten for at den sosiale og kulturelle enheten skal gå tapt. Men disse bekymringene er ofte overdrevne. Riktignok viser forskning at migrasjon under visse omstendigheter kan få negative konsekvenser for innfødte arbeidstakere med tilsvarende kompetanse, men det er også godt dokumentert at disse konsekvensene som regel er ubetydelige eller i visse sammenhenger ganske enkelt traværende.

Argumenter for mobilitet

I denne rapporten argumenterer vi for at migranter bidrar til økt økonomisk produksjon, uten større kostnader for de fastboende. Det kan til og med være tale om mer omfattende positive ringvirkninger, for eksempel når migranter kan passe barn slik at fastboende kvinner kan gå ut i yrkeslivet. Etter hvert som migrantene lærer seg språket og tilegner seg annen kunnskap de trenger for å klatre oppover lønnsstigen, blir mange integrert helt naturlig. Derved blir frykten for at innvandrere ikke lar seg integrere, like uberettiget som frykten som kom til uttrykk overfor irske innvandrere i USA tidlig på 1900-tallet. Men det er også slik at mange migranter blir offer for systemisk diskriminering, noe som gjør det vanskelig eller umulig for dem å benytte seg av lokale tjenester på lik linje med de fastboende. Disse problemene er spesielt alvorlige for midlertidige og ulovlige arbeidsinnvandrere.

I migrantenes hjemland gir mobiliteten seg utslag i høyere inntekt og forbruk samt bedre utdanning og helse, i videre forstand også på det kulturelle og sosiale plan. Flytting medfører som regel fordeler, noe som kommer konkret til uttrykk først og fremst gjennom pengeoverføringer til den nærmeste familie. Men fordelene spres videre utover i samfunnet når disse pengene settes i omløp slik at det skapes arbeidsplasser lokalt, og når atferden endres i takt med impulser utenfra. Særlig gjelder dette kvinner, som dermed kan unnslippe det tradisjonelle kjønnsrollemønsteret.

Konsekvensene og omfanget av disse endringsene avhenger av hvem som flytter, hvordan det går med dem i utlandet, og om de opprettholder kontakten med hjemlandet gjennom overføring av penger, kunnskap og ideer. Siden migranter ofte kommer i stort antall fra bestemte steder – som Kerala i India eller Fujian-provinsen i Kina – blir konsekvensene ofte mer merkbare lokalt enn nasjonalt. På lengre sikt kan likevel utveksling av ideer som følge av menneskelig mobilitet få vidtrekkende konsekvenser for sosiale normer og klassestrukturen i landet som helhet. Til dels anses det uehdig at kompetanse forsvinner ut av landet, særlig innenfor utdanning og helse. Men også i dette tilfellet er den beste løsningen å følge en politikk som tar for seg de underliggende strukturelle problemene, som lave lønninger, manglende finansiering og svake institusjoner. Å legge skylden for at faglært arbeidskraft

Ved å bygge ned eksisterende mobilitetshindre og gi migranter bedre behandling, kan det være store gevinst for menneskelig utvikling

emigrerer, på arbeidstakerne selv, er ingen løsning, og å begrense deres mobilitet vil som regel virke mot sin hensikt, i tillegg til at dem det gjelder, fratras den grunnleggende rettigheten det er å kunne forlate sitt hjemland.

Men selv om internasjonal migrasjon blir bedre forvaltet, kan den ikke erstatte en nasjonal strategi for menneskelig utvikling. Med få unntak (hovedsakelig små øystater der mer enn 40 % av innbyggerne emigrerer) er det lite sannsynlig at migrasjon kan bidra til å forme en hel nasjons utsikter til utvikling. Det er i beste fall en løsning som kommer i tillegg til en bredere lokal og internasjonal innsats for å bekjempe fattigdom og bedre den menneskelige utviklingen. Denne innsatsen er minst like viktig som før.

Vi er i skrivende stund inne i den mest alvorlige økonomiske krisen verden har sett på over 50 år. Redusert økonomisk aktivitet og oppsigelser får konsekvenser for millioner av arbeidstakere, deriblant migranter. Vi mener den økonomiske nedgangen er en gyllen anledning til å innføre en ny ordning for migranter – en ordning som gagner arbeidstakere i inn- og utland, samtidig som den kan forhindre økt proteksjonisme. Når økonomien kommer på foten igjen, vil mange av de underliggende forholdene som har fremmet mobilitet de siste 50 årene, igjen gjøre seg gjeldende og påvirke flere mennesker til å flytte. Det er svært viktig at myndighetene iverksetter nødvendige tiltak som en forberedelse til dette.

Vårt forslag

Ved å bygge ned eksisterende mobilitetshindre og gi migranter bedre behandling, kan det være

Box 1

The core package

Overcoming Barriers lays out a core package of reforms, which comprises six ‘pillars’. Each pillar is beneficial on its own, but together these offer the best chance of maximizing the human development impacts of migration:

1. Liberalizing and simplifying regular channels that allow people with low skills to seek work abroad;
2. Ensuring basic rights for migrants;
3. Reducing transaction costs associated with migration;
4. Improving outcomes for migrants and destination communities;
5. Enabling benefits from internal mobility; and
6. Making mobility an integral part of national development strategies.

store gevinster å hente innenfor menneskelig utvikling, men da trengs det dristige visjoner. I denne rapporten argumenterer vi for omfattende reformer som kan gi migranter, lokalsamfunn og nasjoner store fordeler.

Forslaget omtaler to dimensjoner ved mobilitet der det er mest å hente ved utforming av en god politikk: innreise og behandling. Reformene som inngår i forslaget, vil gi utbytte på mellomlang og lang sikt. De angår ikke bare myndighetene i bestemmelseslandet, men også myndighetene i opprinnelseslandet, andre sentrale aktører – særlig privat sektor, fagbevegelsen og ikke-statlige organisasjoner – og den enkelte migrant. Politikerne står overfor de samme utfordringene, men migrasjonspolitikken må selv-sagt utformes og gjennomføres på ulike vis i de respektive landene, i samsvar med nasjonale og lokale forhold. Visse typer tiltak har likevel vist seg å være særlig effektive og kan derfor benyttes i større omfang.

Vi har fokusert på seks hovedtiltak for reform. Disse kan iverksettes uavhengig av hverandre, men vil kunne ha bedre effekt på den menneskelige utvikling dersom de benyttes samlet i en integrert tilnærming: Man bør åpne eksisterende innreisekanaler slik at flere arbeidstakere kan emigrere, sikre grunnleggende rettigheter for migranter, redusere transaksjonskostnadene ved migrasjon, finne løsninger som gagner både vertssamfunnet og migrantene som søker dit, gjøre det enklere for folk å flytte innenfor sitt eget land og gjøre migrasjon til en integrert del av nasjonale utviklingsstrategier. Alle disse tilnærningsmålene er viktige bidrag til menneskelig utvikling og utfyller hverandre.

I forslaget drøftes to mulige løsninger for å åpne eksisterende regulære kanaler for innreise:

- Vi anbefaler at ordningene for utpreget sesongarbeid innenfor næringer som jordbruk og reiseliv utvides. Slike ordninger har allerede gitt gode resultater i en rekke land. Erfaring fra tiltak som har vist seg effektive, tilsier at fagbevegelsen og arbeidsgiversiden bør involveres, likeledes myndighetene i opprinnelses- og bestemmelseslandet, særlig når det gjelder utforming og gjennomføring av minstelønns-garantier, helse og sikkerhetsstandarder samt bestemmelser om gjentatte innreiser, slik tilfellet er i for eksempel New Zealand.

- Vi foreslår videre å øke antallet visa for lavt kvalifisert arbeidskraft, og at dette må være betinget av etterspørsmålet lokalt. Erfaring viser at følgende tiltak har vist seg effektive her: Sikre at innvandrere har rett til å skifte arbeidsgiver ("employer portability"), gi innvandrere rett til å søke om forlenget opphold og skissere ulike løsninger for hvordan de kan oppnå permanent opphold, fastsette bestemmelser som gjør det enklere for innvandrere å reise til hjemlandet i visumperioden, og åpne opp for overføring av opparbeide trygderettigheter, slik det nylig ble vedtatt i en reform i Sverige.

Bestemmelseslandene bør avgjøre hvor mange innvandrere de ønsker motta, gjennom politiske prosesser som åpner for offentlig debatt og avveininger av ulike interesser. Det bør etableres mekanismer som sikrer innsyn, for å fastsette antall innvandrere, og tallet bør ta utgangspunkt i arbeidsgivernes behov, med kvoter som gjenspeiler landets økonomiske situasjon.

I bestemmelseslandene blir innvandrere ofte behandlet på måter som er i strid med grunnleggende menneskerettigheter. Også i land der myndighetene ikke har ratifisert de internasjonale konvensjonene som ivaretar arbeidsinnvandreres rettigheter, bør migrantene sikres fulle rettigheter på arbeidsplassen, som rett til lik lønn for likt arbeid, anstendige arbeidsforhold og organisasjonsrett. Rask handling kan være påkrevet for å få bukt med diskriminering. Myndighetene i opprinnelses- og bestemmelseslandet kan samarbeide for å gjøre det enklere å få godkjent attestet og skussmål fra utlandet.

Nedgangstidene vi nå er inne i, har gjort migranter spesielt sårbar. Myndighetene i enkelte bestemmelsesland har begynt å praktisere migrasjonslovgivningen strengere, slik at det kan gå ut over migrantenes rettigheter. Hvis oppsagte migranter får mulighet til å søke jobb hos en annen arbeidsgiver (eller i det minste anledning til å ordne sakene sine før de må forlate landet), og hvis sysselsettingsprognosene offentliggjøres, blant annet når det forventes en nedgang i etterspørsmålet etter arbeidskraft i opprinnelseslandet, kan dette bidra til å redusere den uforholdsmessig store andelen av byrden som dagens og fremtidens migranter må bære som følge av finanskrisen.

Flytting over landegrensene er ofte forbundet med høye transaksjonskostnader for å skaffe

nødvendige papirer og oppfylle administrative krav til inn- og utreise. Disse kostnadene er i tillegg gjerne regressive (proporsjonalt høyere for ufaglært arbeidskraft og arbeidstakere på kortvarige kontrakter) og kan også ha en utilsiktet virkning ved at de oppfordrer til ulovlig innreise og menneskesmugling. I ett av ti land i verden koster et pass mer enn 10 % av gjennomsnittlig inntekt. Ikke overraskende er det en negativ korrelasjon mellom disse kostnadene og migrasjons-tallene. Myndighetene både i opprinnelses- og bestemmelseslandet kan forenkle prosedyrene og senke dokumentavgiftene, samtidig som de også kan samarbeide om å forbedre og regulere formidlingstjenestene.

Det er svært viktig å sikre at den enkelte migrant finner seg godt til rette ved ankomst, men like viktig er det at det ikke oppleves som en urimelig byrde på lokalsamfunnet at migrantene legger ekstra beslag på sentrale tjenester lokalt. Hvis dette blir et problem for de lokale myndighetene, kan det bli behov for ekstra overføringer fra staten. Dersom barn av migranter sikres lik rett til utdanning og eventuelt støtteundervisning slik at de kan ta igjen forsømt skolegang og bli integrert,

Migrasjon kan ikke erstatte en omfattende innsats for utvikling, men det kan være en viktig strategi for husholdninger og familier som ønsker å diversifisere og bedre eksistensgrunnlaget

kan dette bedre fremtidsutsiktene deres og hindre at det oppstår en fremtidig underklasse. Språkundervisning står sentralt her – ikke bare for skolebarn, men også for voksne, både på arbeidsplassen og gjennom egne tiltak som fanger opp hjemmeværende kvinner. I enkelte situasjoner vil det være behov for en mer aktiv innsats for å bekjempe diskriminering, håndtere sosiale konflikter og eventuelt forebygge voldsepisoder rettet mot innvandrere. Sivilsamfunnet og myndighetene har bred og positiv erfaring med å håndtere diskriminering gjennom for eksempel holdningskampanjer.

Selv om kun et fåttall land i dag praktiserer planøkonomi, er det overraskende mange land i verden – om lag en tredjedel – som har et de facto forbud mot intern forflytning. Restriksjonene tar gjerne form av begrenset tilgang til grunnleggende tjenester og innskrenkede rettigheter for dem som ikke er registrert lokalt. Det fører til diskriminering av interne migranter, slik tilfellet fortsatt er i Kina. Et av de sentrale forslagene i rapporten går ut på å sikre at interne migranter har samme tilgang til grunnleggende tjenester som fastboende. Likebehandling er viktig for midlertidige arbeidere, sesongarbeidere og familiene deres, for regionene de drar til for å arbeide, og også for å sikre tilfredsstillende tjenester i hjemregionen, slik at de ikke føler seg tvunget til å flytte for å få tilgang til skoler og helsetjenester.

Migrasjon kan ikke erstatte en omfattende innsats for utvikling, men det kan være en viktig strategi for husholdninger og familier som ønsker å diversifisere og bedre eksistensgrunnlaget, særlig i utviklingsland. Myndighetene må anerkjenne dette potensialet og sørge for at migrasjon blir en integrert del av landets utviklingspolitikk. Erfaring viser at et lands økonomiske forhold og sterke offentlige institusjoner er avgjørende for å kunne høste fordelene ved mobilitet.

Veien videre

Det vil kreve sterkt og opplyst lederskap for å få gjennomslag for disse synspunktene, i tillegg til en mer målrettet innsats overfor publikum for å skape økt bevissthet om migrasjon blant folk.

Opprinnelseslandene vil få et bedre grunnlag for å integrere mobilitet i sine utviklingsstrategier ved å foreta en mer systematisk vurdering av fordelene, omkostningene og farene ved migrasjon. Emigrasjon er ikke et alternativ til økt innsats for utvikling hjemme, men mobilitet kan gjøre det enklere å få tilgang til ideer, kunnskap og ressurser som kan komplettere og i enkelte tilfeller fremme utviklingen.

I bestemmelleslandene er det avgjørende å ha et realistisk syn på de økonomiske og sosiale forholdene for å kunne bestemme når og hvordan reformer skal gjennomføres.

Internasjonalt samarbeid, særlig gjennom bi-laterale eller regionale avtaler, kan gi bedre forvaltning av migrasjon, bedre vern om migrantenes rettigheter og større bidrag fra migrantene til hjem- og vertslandet. I enkelte regioner, blant annet Vest-Afrika og den sørlige delen av Latin-Amerika, opprettes det soner med fri bevegelighet for å fremme frihandel, samtidig som migrasjon gjøres mer attraktivt. Utvidelsen av arbeidsmarkedet i disse regionene kan medføre betydelige fordele for migranter, deres familier og lokalsamfunn.

Det er fremsatt forslag om å opprette en ny internasjonal ordning for å bedre migrasjonsforvaltningen, og per i dag deltar mer enn 150 land i Globalt forum for migrasjon og utvikling. Myndigheter som står overfor felles utfordringer, utvikler felles løsninger – en tendens som ble stadig tydeligere mens vi arbeidet med denne rapporten.

Årets HDR rapport *Å bryte barrierer* plasserer menneskelig utvikling høyt på dagsordenen til de politiske beslutningstakerne som ønsker en best mulig løsning i en verden der menneskers forflytning danner stadig mer komplekse mønstre.

HDI 2007: resultater og trender

Den menneskelige utviklingsindeksen (HDI) mäter et lands gjennomsnittlige menneskelige utvikling, på bakgrunn av tre grunnleggende variabler:

- Muligheten til å leve et langt og sunt liv, målt i forventet levealder
- Tilgang til kunnskap, målt i lesekyndighet blandt voksne og skolegang på alle nivåer, og
- BNP per innbygger, målt i US dollar, etter kjøpekraft (PPP)

De tre variablene måles til verdier mellom 0 og 1, hvor 1 er høyest. Gjennomsnittet blir deretter benyttet for å komme fram til gjeldende HDI verdi, også angitt på en skala fra 0 og 1. Alle landene blir så rangert på bakgrunn av denne verdien.

Årets HDI, som bruker data fra 2007, presenterer verdiene for 182 land. Andorra og Liechtenstein er begge med for første gang, og Afghanistan er med for første gang siden 1996. Resultatene tar i betraktning både nye data og revisjoner av tidligere dataserier.

Det er viktig å merke seg at HDI-resultatene, basert på tall fra 2007, ikke reflekterer effektene av den globale finanskrisen, som er ventet å få konsekvenser for den menneskelige utviklingen i mange land.

Fra 2006 til 2007 falt HDI-verdiene i fire land, som et resultat av synkende BNP per innbygger, men steg i 174 land. Samtidig var det langt flere endringer i landenes rangering - mer enn 50 land falt en eller flere plasseringer, mens et tilsvarende antall beveget seg oppover.

Endringer i rangeringen skyldes imidlertid ikke bare landets egne prestasjoner, men påvirkes av framgangen til andre land, særlig der hvor det er små marginer mellom de ulike landenes rangering. Kina har hatt den største framgangen i rangering (syv plasser), etterfulgt av Colombia og Peru (fem plasser). I hvert av disse landene kan framgangen relateres til rask økonomisk vekst.

Norge toppt listen, etterfulgt av Australia på andre plass, og Island på tredje. Dette er samme rangering som foregående år. På ”topp ti” er det få endringer, med bare én nykommer, Frankrike, som har overtatt for Luxembourg. I motsatt ende av indeksen finner vi Sierra Leone, Afghanistan og Niger på de tre siste plassene, samme rangering som i 2006.

De fleste landene har en relativt stabil framgang, og har ikke beveget seg mer enn en eller to plasser på indeksen. I Afrika sør for Sahara har for eksempel Ghana klatret to plasser opp, på grunn av forbedringer i utdanningssektoren, mens Tsjad, Mauritius og Swaziland falt to plasser ned.

Anbefalinger

Rapporten *Å bryte barrierer* argumenterer for en rekke reformer. Disse kan implementeres enkeltvis, men gir samlet sett et optimalt rammeverk for å utnytte migrasjon som et ledd i menneskelig utvikling

1 Liberalisere og forenkle innreisekanalene som gjør det mulig for mennesker å søke arbeid utenlands, inkludert midlertidig, sesongbasert og fast arbeid.

- Den menneskelige mobiliteten begrenses av politikken i hjemlandet, bestemmelseslandet og internasjonalt. Dette reduserer et globalt utviklingspotensial.
- Migrasjon er en prosess som må forvaltes, ikke et problem som må løses.

2 Sikre migranter, både internasjonale og interne, samme rettigheter som befolkningen forøvrig.

- Bedre behandling av migranter, fører til betydelige fordeler både for migrantene, samt deres opprinnelses- og bestemmelsesland.

3 Redusere transaksjonskostnader forbundet med migrasjon, som pass- og visumutgifter.

- Kostnadene knyttet til migrasjon er høyest for de fattigste.
- De administrative kravene migranter står overfor, blant annet høye utgifter til utstedelse av pass, må senkes. Dette kan minske incentivene for ulovlig innreise.

4 Forberede lokalsamfunn på ankomst av migranter, både gjennom holdningskampanjer og ekstra økonomiske overføringer til det aktuelle lokalsamfunnet.

- Frykten for at migranter tar jobbene fra de lokale eller bidrar til å senke lønningene og at de utgjør en ekstra byrde på offentlige tjenester, er som regel overdrevne.

- Migranter, inkludert lavt kvalifiserte arbeidstagere, bidrar ofte positivt til økonomien.

5 Fjerne restriksjoner for intern migrasjon, og sikre at interne migranter har samme tilgang til grunnleggende tjenester som fastboende.

- Det overveldende flertallet av verdens migranter flytter innenfor eget land. Rundt 740 millioner mennesker er interne migranter
- Det å overvåke og opprettholde restriksjoner på intern forflytning er ressurskrevende.
- Likebehandling innad i et land er viktig for å sikre at interne migranter ikke føler seg tvunget til å bli på hjemstedet for å få tilgang til skoler og helsetjenester.

6 Integrere migrasjon i nasjonal og internasjonal utviklingspolitikk, som en del av en bredere strategi for å bekjempe fattigdom, og skape nye muligheter.

- Familiemedlemmer som emigrerer bidrar til den lokale utviklingen i opprinnelseslandet, gjennom økt kapitalflyt, remisser, og nye tanker og ideer, men krever sterkere institusjoner.
- Problemene knyttet til ”hjerneflukt” av høy kvalifiserte arbeidstakere er et symptom, snarere enn årsaken til, svak offentlig sektor i hjemlandet
- Migrasjon er ikke et alternativ, men et tillegg til, en omfattende utviklingsstrategi nasjonalt og internasjonalt.

Begrepsforklaringer og forkortelser

Menneskelig utvikling

Menneskelig utvikling er en prosess som øker menneskers valgmuligheter. Dette skjer ved at mennesker får økt evne til å handle og påvirke sin egen situasjon, og er derfor både en prosess og et mål i seg selv. På alle utviklingsnivåer er de tre viktigste betingelsene et langt liv, utdanning og tilgang til de ressursene som trengs for å oppnå en akseptabel levestandard. Menneskelig utvikling favner imidlertid bredere enn som så og anser også deltagelse, sikkerhet, bærekraftighet og menneskerettigheter som viktige komponenter i prosessen. Menneskelig utvikling skaper forutsetninger for kreativitet og produktivitet, selvrespekt, økonomisk og politisk innflytelse og en følelse av tilhørighet i samfunnet.

Menneskelig og økonomisk fattigdom

Menneskelig fattigdom kan komme til uttrykk både gjennom lav levealder, utilstrekkelig levestandard og manglende utdanning og deltagelse. Økonomisk fattigdom blir derimot kun målt i inntekt. Det er en utbredt oppfatning at det er det økonomiske aspektet som er viktigst, eller at all fattigdom kan reduseres til denne ene fellesnevneren. Begrepet "menneskelig fattigdom" ser mangelen på tilstrekkelig inntekt som en viktig faktor, men ikke som den eneste. Ifølge dette begrepet kan derfor ikke fattigdom reduseres til økonomisk fattigdom.

Indeks for menneskelig utvikling (HDI)

Indeks for menneskelig utvikling måler i hvilken grad et land lykkes i forhold til de tre grunnleggende aspektene av menneskelig utvikling: forventet levealder, utdanning og levestandard. Disse måles ved hjelp av tre variabler: deltagelse gjennomsnittlig levealder, utdanningsnivå (lesekyndighet blant voksne og skolegang på alle nivåer) og BNP per innbygger (omregnet i kjøpekraft og ikke etter gjeldene valutakurser).

Indeks for kjønnsrelatert menneskelig utvikling (GDI)

Indeksen for kjønnsrelatert menneskelig utvikling benytter de samme variablene som HDI, men tar høyde for ulikheter mellom kvinner og menn. Jo større ulikheterne er mellom kvinner og menn i forhold til menneskelig utvikling, dess lavere er et lands GDI i forhold til HDI. GDI-verdien er derfor landets HDI-verdi korrigert for likestilling mellom kjønnene.

Indeks for fattigdom (HPI)

HPI måler mangelen på menneskelig utvikling. Mens HDI måler et lands framskritt når det gjelder å oppnå menneskelig utvikling som helhet, viser HPI hvordan framskritten fordeler seg, og måler de mangler som fortsatt finnes. Det finnes en HPI-indeks for utviklingsland (HPI-1), og en for i-land (HPI-2). En egen indeks har blitt utarbeidet for i-land ettersom definisjonen på fattigdom varierer med et samfunns sosiale og økonomiske vilkår, og for å dra nytte av at det er lettere å skaffe til veie opplysninger om disse landene.

Indeks for likestilling (GEM)

Indeksen måler likestilling ut i fra tre faktorer: deltagelse i og myndighet til å ta beslutninger i økonomiske spørsmål, politisk deltagelse, og bestemmelsesrett og makt over økonomiske ressurser.

Intern migrasjon

Menneskelig forflytning innenfor et og samme land med resultat i en endring av opprinnelig hjemsted. Intern migrasjon måles i forhold til om migranten har krysset regionale grenser eller endret hjemkommune, fylke eller liknende.

Internasjonal migrasjon

Menneskelig forflytning over internasjonale grenser, med resultat i endring av hjemland for personen som flytter.

Migrant

En person som har endret hjemsted enten ved å krysse internasjonale grenser eller ved å flytte innad i hjemlandet fra et distrikt eller region til en annen. En emigrant er en migrant sett ut ifra landet han/hun drar *fra*, mens en innvandrer (immigrant på engelsk) er en migrant sett ut ifra landet han/hun flytter *til*.

Menneskelig mobilitet

Menneskers mulighet til selv å velge hvor de vil bo, det være seg en familie, et individ eller en gruppe.

Menneskelig forflytning

Når migranter endrer hjemsted.

Intern fordrevne mennesker (IDPs)

Individer eller grupper som har blitt tvunget til å flytte som et resultat av, eller for å unngå: effektene av væpnet konflikt, vold, krenkelse av menneskerettighetene eller natur- eller menneskelagde katastrofer. Disse menneskene har ikke krysset en internasjonal grenseovergang.

Flyktninger

Individer eller grupper av mennesker som har flyktet fra hjemlandet sitt på grunn av en vel-begrunnet frykt for å bli forfulgt på bakgrunn av: rase, religion, nasjonalitet, politisk overbevisning eller tilhørighet til en bestemt sosial gruppe. Flyktninger er mennesker som flykter fra et land de ikke kan, eller ikke vil, dra tilbake til.

Remisser

Remisser er økonomiske midler og materielle ressurser som blir overført fra internasjonale migranter eller flyktninger til mottakere i hjemlandet, eller til tidligere hjemland.

NOTES

The human development index values in this table were calculated using a consistent methodology and data series. They are not strictly comparable with those published in earlier Human Development Reports. See the Reader's guide for more details.

a Average annual growth rate between 1985 and 2007.

SOURCES

Columns 1–8: calculated based on data on life expectancy from UN (2009e); data on adult literacy rates from UNESCO Institute for Statistics (2003) and (2009a); data on combined gross enrolment ratios from UNESCO Institute for Statistics (1999) and (2009b); and data on GDP per capita (2007 PPP US\$) from World Bank (2009d).

Column 9: calculated based on revised HDI values for 2006 in column 7.

Column 10: calculated based on revised HDI ranks for 2006 and new HDI ranks for 2007.

Column 11: calculated based on the HDI values for 1980 and 2007.

Column 12: calculated based on the HDI values for 1990 and 2007.

Column 13: calculated based on the HDI values for 2000 and 2007.

NOTES

- a** Data refer to national literacy estimates from censuses or surveys conducted between 1999 and 2007, unless otherwise specified. Due to differences in methodology and timeliness of underlying data, comparisons across countries and over time should be made with caution. For more details, see <http://www.uis.unesco.org/>.
- b** A positive figure indicates that the HDI rank is higher than the GDP per capita (PPP US\$) rank; a negative figure, the opposite.
- c** For the purposes of calculating the HDI, a value of 99.0% was applied.
- d** Data refer to a year other than that specified.
- e** For the purposes of calculating the HDI, a value of 40,000 (PPP US\$) was applied.
- f** For the purposes of calculating the HDI, a value of 100% was applied.
- g** UNESCO Institute for Statistics estimate.
- h** Statec (2008). Data refer to nationals enrolled both in the country and abroad and thus differ from the standard definition.
- i** Data are from a national household survey.
- j** UNESCO Institute for Statistics estimates based on its Global Age-specific Literacy Projections model, April 2009.
- k** For the purposes of calculating the HDI unpublished estimates from UN (2009e) were used: Andorra 80.5, Antigua and Barbuda 72.2, Dominica 76.9, Liechtenstein 79.2, Saint Kitts and Nevis 72.2 and the Seychelles 72.8.
- l** National estimate.
- m** HDRO estimate based on GDP from UN (2009c) and the PPP exchange rate for Switzerland from World Bank (2009d).
- n** Because the combined gross enrolment ratio was unavailable, the following HDRO estimates were used: Antigua and Barbuda 85.6, Ecuador 77.8, Haiti 52.1, Singapore 85.0 and Turkmenistan 73.9.
- o** In the absence of recent data, estimates for 2005 from UNESCO Institute for Statistics (2003), based on outdated census or survey information, were used and should be interpreted with caution: the Bahamas 95.8, Barbados 99.7, Djibouti 70.3, Fiji 94.4, the Gambia 42.5, Guyana 99.0 and Hong Kong, China (SAR) 94.6.
- p** HDRO estimate based on GDP from UN (2009c).
- q** World Bank estimate based on regression.
- r** Data are from a national census of population.
- s** Heston, Summers and Aten (2006). Data differ from the standard definition.
- t** Data are from the Secretariat of the Organization of Eastern Caribbean States, based on national sources.
- u** Data refer to Serbia and Montenegro prior to its separation into two independent states in June 2006. Data exclude Kosovo.
- v** UNESCO Institute for Statistics (2007).
- w** Data exclude Kosovo.
- x** Data are from the Secretariat of the Caribbean Community, based on national sources.
- y** Data are from UNICEF's Multiple Indicator Cluster Survey.
- z** UNDP (2007d).
- aa** UNESCO Institute for Statistics (2008a).
- ab** UNICEF (2004).
- ac** In the absence of an estimate of GDP per capita (PPP US\$), an HDRO estimate of 2,243 (PPP US\$) was used, derived from the value of GDP for 2005 in US\$ and the weighted average ratio of PPP US\$ to US\$ in the Arab States. The value is expressed in 2007 prices.
- ad** Data refer to North Sudan only.
- ae** UNDP (2006b).
- af** Data are aggregates provided by original data source.
- ag** Calculated on the basis of GDP in PPP US\$ for 2006 from World Bank (2009d) and total population for the same year from UN (2009e).

SOURCES

- Column 1:** calculated based on data in columns 6–8.
- Column 2:** UN (2009e).
- Column 3:** UNESCO Institute for Statistics (2009a).
- Column 4:** UNESCO Institute for Statistics (2009b).
- Column 5:** World Bank (2009d).
- Column 6:** calculated based on data in column 2.
- Column 7:** calculated based on data in columns 3 and 4.
- Column 8:** calculated based on data in column 5.
- Column 9:** calculated based on data in columns 1 and 5.

TABLE**NOTES**

t Denotes indicators used to calculate the human poverty index (HPI-1). For further details, see Technical note 1: www.hdr.undp.org/en/statistics/tnt1

a Data refer to the probability at birth of not surviving to age 40, multiplied by 100.

b Data refer to national illiteracy estimates from censuses or surveys conducted between 1999 and 2007, unless otherwise specified. Due to differences in methodology and timeliness of underlying data, comparisons across countries and over time should be made with caution. For more details, see <http://www UIS.unesco.org/>.

c Data refer to the most recent year available during the period specified.

d Income poverty refers to the share of the population living on less than \$1.25 a day. All countries with an income poverty rate of less than 2% were given equal rank. The rankings are based on countries for which data are available for both indicators. A positive figure indicates that the country performs better in income poverty than in human poverty, a negative the opposite.

e For the purposes of calculating the HPI-1 a value of 1% was assumed.

f Estimates cover urban areas only.

g Data refer to an earlier year outside the range of years specified.

h Data are from a national household survey.

i UNESCO Institute for Statistics estimates based on its Global Age-specific Literacy Projections model, April 2009.

j Data refer to an earlier year than that specified.

k In the absence of recent data, estimates for 2005 from UNESCO Institute for Statistics (2003), based on outdated census or survey information, were used and should be interpreted with caution: Bahamas 4.2, Barbados 0.3, Djibouti 29.7, Fiji 5.6, Gambia 57.5, Guyana 1.0 and Hong Kong, China (SAR) 5.4.

l National estimate.

m UNICEF (2005b).

n Data are from a national census of population.

o Data are from the Secretariat of the Organization of Eastern Caribbean States, based on national sources.

p Data refer to Serbia and Montenegro prior to its separation into two independent states in June 2006. Data exclude Kosovo.

q Data are from the Secretariat of the Caribbean Community, based on national sources.

r Data are from UNICEF's Multiple Indicator Cluster Survey.

s UNICEF (2004).

t Estimates are weighted averages of urban and rural values.

u Estimates have been adjusted for arsenic contamination levels based on national surveys conducted and approved by the government.

v Estimates are adjusted by spatial consumer price index information.

w Data refer to North Sudan only.

x UNDP (2006b).

SOURCES

Column 1: determined on the basis of HPI-1 values.

Column 2: calculated on the basis of data in columns 3–6.

Column 3: UN (2009e).

Column 4: UNESCO Institute for Statistics (2009a).

Columns 5 and 6: UN (2009a) based on a joint effort by UNICEF and WHO.

Columns 7–9: World Bank (2009d).

Column 10: calculated based on HPI-1 values and the income poverty measures.

NOTES

- a** 2010 projections are based on long-run tendencies and may not accurately predict the effect of unexpected short-term fluctuations such as the 2009 economic crisis. See UN (2009d) for further details.
- b** Due to differences in definition of the underlying data, cross country comparisons should be made with caution. Data are from different censuses and surveys and refer to different time periods and so are not strictly comparable.
- c** Data are estimates based on censuses from Bell and Muhidin (2009). Internal migrants are expressed as a percentage of the total population.
- d** Estimates for 1960 for Germany refer to the former Federal Republic of Germany and the former German Democratic Republic.

SOURCES

- Columns 1–4 and 6–9:** UN (2009d).
- Column 5:** calculated based on data from UN (2009d).
- Column 10:** calculated based on data from Migration DRC 2007 and population data from UN (2009e).
- Column 11:** calculated based on data from Migration DRC (2007).
- Column 12–13:** various (as indicated).

- e** Estimates for 1960 for the Czech Republic, the Russian Federation and Serbia refer to the former states of Czechoslovakia, the Soviet Union and Yugoslavia respectively.
- f** Data are estimates based on censuses from ECLAC (2007). Internal migrants are expressed as a percentage of the total population.
- g** Data are estimates based on household surveys from the World Bank (2009e). Internal migrants are expressed as a percentage of the working age population only.
- h** Data for Montenegro are included with those for Serbia.
- i** Data are aggregates from original data source.

International emigrants by area of residence

NOTES

a Percentages may not sum to 100% due to movements to areas not classified by human development categories.

b Data refer to Serbia and Montenegro prior to its separation into two independent states in June 2006.

SOURCES

All columns: calculated based on data from Migration DRC (2007).

NOTES

- a** Estimates maintained by the IDMC are based on various sources and are associated with high levels of uncertainty.
- b** Higher figure includes an estimate of internally displaced Bedouin.
- c** Data refer to a year or period other than that specified.
- d** Figure includes 206,000 registered IDPs in Serbia plus an estimated 20,000 unregistered Roma displaced in Serbia and 21,000 IDPs in Kosovo.
- e** Figure includes forced migrants registered in Ingushetia and Chechnya.
- f** Figure includes 32,000 Palestinian refugees displaced as a result of fighting between Lebanese forces and Fatah al Islam in May–August 2007.
- g** Including Palestinian refugees under the responsibility of UNRWA (2008).

h Figure refers to those displaced from Nagorno Karabakh and seven occupied territories.

- i** Some 59,000 people displaced since the August 2008 crisis have not been able to return. There are some 221,597 IDPs based on the result of a survey conducted by UNHCR and the government but these are yet to be endorsed.
- j** There are no reliable estimates but in 2002, the EU estimated the number to be 100,000.
- k** Figures are suspected to be underestimate.
- l** Lower figure relates to IDPs evicted by home demolitions in Gaza between 2000 and 2004 whilst higher figure is cumulative since 1967.
- m** Figure relates to the eastern border areas only.
- n** Exact IDP numbers are unknown but conflict induced displacement has taken place in the North-West Frontier province, Baluchistan and Waziristan.

o Figure refers to IDPs in Cabinda region only.

- p** Figure takes into account the government's return programme which claims that some 172,000 displaced due to the post-election violence returned in May 2008.
- q** Figures are based on separate estimates for Darfur, Khartoum and Southern Sudan.
- r** Excludes IDPs in urban areas.
- s** Figure includes an estimated 250,000 civilians who fled their homes in North Kivu due to fighting between the national army and CNDP rebels.
- t** It is believed that there are more than 200,000 IDPs.
- u** Data are aggregates from the original data source.
- v** Figure is cumulative since 2001 and includes 1.5 million people displaced due to a rise in inter-communal violence since February 2006.

SOURCES

- Columns 1, 3, 4, 7, 9 and 10:** UNHCR (2009b).
- Column 2:** calculated based on data from UNHCR (2009b) and Migration DRC (2007).
- Columns 5 and 11:** UNHCR (2009a).
- Column 6:** IDMC (2009a).
- Column 8:** calculated based on UNHCR (2009b) and UN (2009d).

TABLE

International financial flows: remittances, official development assistance and foreign direct investment

NOTES

a Data are as of 28 February 2009, unless otherwise specified. Where there are lower and upper houses, data refer to the weighted average of women's shares of seats in both houses.

b Data refer to the most recent year available between 1999 and 2007. Estimates for countries that have implemented the International Standard Classification of Occupations (ISCO-88) are not strictly comparable with those for countries using the previous classification (ISCO-68).

c Calculated on the basis of data in columns 10 and 11 in Table J. Estimates are based on data for the most recent year available between 1996 and 2007. Following the methodology implemented in the calculation of the GDI, the income component of the GEM has been scaled downward for countries whose income exceeds the maximum goalpost GDP per capita value of 40,000 (PPP US\$). For more details, for more details see <http://hdr.undp.org/en/statistics/tn1>

d Data refer to the year in which the right to vote or stand for national election on a universal and equal basis was recognized. Where two years are shown, the first refers to the first partial recognition of the right to vote or stand for election. In some countries, women were granted the right to vote or stand at local elections before obtaining these rights for national elections; however, data on local election rights are not included in this table.

e Date at which, for the first time in the country's parliamentary history, a woman became speaker/presiding officer of parliament or of one of its houses. As of May 2009, women occupy only 12.6% of the total number of 269 posts of Presiding Officers of parliament or of one of its houses.

f Data are as of January 2008. The total includes deputy prime ministers and ministers. Prime ministers were also included when they held ministerial portfolios. Vice-presidents and heads of governmental or public agencies are not included.

g Countries with established quota systems for women. Quota systems aim at ensuring that women constitute at least a 'critical minority' of 30 or 40 percent. Today women constitute 16 percent of the members of parliaments around the world.

h Data follow the ISCO-68 classification.

i The total refers to all voting members of the House.

j No information is available on the year all women received the right to stand for election. As the country's constitution does not mention gender with regard to this right.

k According to the new constitution approved in 2003, women are granted suffrage. To date, no legislative elections have been held.

l In December 2006, the Federal National Council was renewed. Men and women were entitled to vote, under similar conditions. One woman was elected to the Council and 7 subsequently appointed.

m Serbia and Montenegro separated into two independent states in June 2006. Women received the right to vote and to stand for elections in 1946, when Serbia and Montenegro were part of the former Yugoslavia.

n The 2008 Constitution provides that the National Congress shall be replaced by a 124-member National Assembly. Elections to that body are due to take place on 26 April 2009. During the transitional period, a Legislative and Oversight Commission, comprising the members of the Constituent Assembly, assumes the legislative and oversight functions. The date refers to the date when the Commission held its first session.

o No woman candidate was elected in the 2008 elections. One woman was appointed to the cabinet. As cabinet ministers also sit in parliament, there was one woman out of a total of 32 members in October 2008.

p The parliament was dissolved following a coup d'état in December 2006.

q The figures on the distribution of seats do not include the 36 special rotating delegates appointed on an ad hoc basis, and all percentages given are therefore calculated on the basis of the 54 permanent seats.

r The parliament elected in 1990 has never been convened nor authorized to sit, and many of its members were detained or forced into exile.

s Forty five seats reserved for women are yet to be filled.

t In November 1955, Eritrea was part of Ethiopia. The Constitution of sovereign Eritrea adopted on 23 May 1997 stipulates that "All Eritrean citizens, of eighteen years of age or more, shall have the right to vote".

u The parliament was dissolved following a coup d'état in December 2008.
